MAPS OF AFRICA

Directions: As a group, answer the following questions about African geography using the five maps

1. What does the green area represent on the Physical Map?
2. What does the green area represent on the Climate Map?
3. Which country has the capital city of Mogadishu? Which map did you use to find out?
4. Which country is more mountainous, Ethiopia or Botswana? Which map did you use to find out?
5. Which country produces more oil, Libya or Algeria? Which map did you use to find out?
6. Using the Population Map together with the Political Map, what country has the highest overall population density?
7. Based on the Population Map, what area of Africa has the lowest population?
8. Based on the Resource Map, why might the population be so low in that area?
9. How might the Climate Map provide an explanation to the two observations in 7 and 8?
10. Compare Egypt on the Population Density Map and the Resource Map.
 - a. Just by appearance, what do they both have in common?
 - b. What does that mean on the Population Density Map?
 - c. What does that mean on the Resource Map?
 - d. Using the Physical Map, what could explain why this area is different from the rest of Egypt?
